YAGER SEED

and

NURSERY BOOK

Fruits, Trees, Seeds

No Agents

Lowest Prices

Moore's Early (See page 9)

Delicious Apple (See page 3)

Fremont, Nebraska, 1926

Omaha Plum

A fine new Plum. Very large, purplish red. Juicy. Good bearer. Fruits when young. Rapid grower. Highly recommended. Price same as other plums. See page 6.

REMEMBER I save you about one-half on NURSERY Stock, over what the AGENT will charge you for the same items. He gets a good fat commission, while I tell you my story for a DIME.

Carrie Gooseberry (Photo).

THE CARRIE

Best one of all. Its good points are:

1st—Fruit largest size.

2nd — Extremely hardy.

3rd — Bears second year.

4th — Delicious flavor.

5th — Very prolific.

(See price, Page 9)

A Parting Word

GAIN Friends I am sending to you my little TREE and SEED BOOK.

It seems hardly a year since I made my 1925 book, but when we are busy, we are happy, and the greatest blessing in life is to like the particular work we are engaged in.

We see Merchants and Business men, going about telling how fine "business" is, and the question arose as to the source of all this business.

Well, I have thought it over, and it is this: the land is the source of all our wealth, here in the mid-west.

When crops fail for any reason, then business slows down. When hail, floods, drouth, or any other calamity befalls the farmer, then the wheels of business go slowly.

When I was a little boy, down in Otoe County, the grass-hoppers settled down on father's fields one day, and in a short time they swept everything clean, and it was a sad sight, but they passed on, and for many years following, we had abundant crops.

The pendulum of prices and crops makes a wide swing occasionally, just as it has this year.

There seems to be enough corn in this country now to feed all the cattle, hogs, sheep and men for a long time, so the price has slipped down quite a lot.

But with all this we should take heart, for we are far better off than the people of other countries.

The place to look for your knife is "where you lost it."

The farmer that is not extravagant, practices business methods, attends strictly to business, farms his land well, plants good seed, and keeps up the fertility of his soil, will SUCCEED in spite of low prices, and occasional overproduction.

I thank you for reading my letter, and hope to meet you again next year.

J. A. YAGER.

P. S. I appreciate your business and friendship.

READ THIS PAGE CAREFULLY

HOW TO ORDER. For your convenience we enclose an Envelope and Order Sheet, to be used when ordering from this book, but you can send the order on ANY kind of paper, in any kind of an envelope. We will get the order, and you will get the goods you want, we guarantee that.

WHEN TO ORDER. Place your order as early as possible, as delay and confusion are thus avoided and better service is assured.

ACKNOWLEDGMENT. When we get your order we write you immediately, stating the amount of money received, and giving the approximate time of shipment.

AM I RESPONSIBLE? You have a right to know. Three Fremont Banks say I am RELIABLE and that I keep all my promises. Your own banker has my "rating," ask him about Yager. You take no chances whatever.

MY TERMS. Cash should accompany your order, but the money is yours till you get the goods. You may remit by DRAFT, EXPRESS ORDER, POST OFFICE ORDER or PERSONAL CHECK, (in which case add 10c exchange.)

OUR LOCATION. Fremont, Nebraska is in Dodge Co., being 37 miles Northwest of Omaha and 50 miles north of Lincoln.

SHIPPING FACILITIES. Three railroads enter Fremont, namely, Union Pacific, B. & M., and the C. & N. W., thus giving good service to all points. Also we have the American Railway Express Co.

GUARANTEE. I promise that all Nursery Stock will reach you in good live condition. Each variety will be plainly marked, and everything will be packed in the best possible manner. Errors on our part will be cheerfully rectified.

AGENTS. This book is my ONLY SALESMAN. I have no agents, no one has authority to represent my Nursery Co.

REPLACING STOCK. I do not replace Nursery Stock. When the agent sells you an order, he promises to replace stock that dies, but the price he asks you covers his expense of replacing, so you really pay for the replace whether you get it or not. So you get more for your money from me than from the nursery that replaces at half price.

FREE FREIGHT. The Freight or Express will be paid by me on all Nursery orders (but not Seed) amounting to \$10.00. Neighbors may combine orders and get FREE DELIVERY.

INSPECTION. All my Nursery Stock has been inspected by the official known as the State Entomologist, who has given me a "Clean bill of health."

CLAIMS AND DELAYS. If a shipment should arrive in a damaged condition, have the Railroad or Express Agent note same on your receipt, and write us at once. We notify you the day shipment is made. If goods do not arrive in a reasonable time, notify us, so we can trace same.

YAGER NURSERY AND SEED COMPANY Fremont, Nebraska

APPLES

HETHER you own a farm or a city lot, you should have some Apple Trees. Many of the old trees that were planted years ago have served their purpose and new ones should be started to take their places. A few dollars invested now will yield big returns in the years to come. We only offer the best and hardiest varieties. Plant mostly the Winter kinds, with a few Summer and Fall varieties, and perhaps a few crabs. Plant the trees 30 feet apart each way. Protect from rabbits the first two years. Cultivate the soil around the trees and you will be well paid for your efforts.

PRICES ON APPLES AND CRABS

	Each	Per 10
XX select 3 year old, well branched	\$0.55	\$5.00
5 to 6 feet tall, 3 year old, first class		4.50
4 to 5 feet tall, 2 year old, choice trees	40	3.50

Summer Apples

DUCHESS. Very hardy, bears young, red striped. Juicy and tart. Best for sauce and pies. Ripens in July.

EARLY HARVEST. Pale yellow. Fine quality, early bearer. Good eating apples, Quite hardy. Ripens in July.

YELLOW TRANSPARENT (Russian). Waxen yellow. Beautiful, highest quality. Bears second year from planting. Extremely hardy. Ripens at harvest time.

Fall Apples

MAIDEN BLUSH. Rather large. Bears every year. Yellow with red cheek, good for eating. Hardy and juicy. Ripens in September.

WEALTHY. Dark red cheek. Good size. Hardy everywhere. Bears very young. The best cooking and baking apple. Ripens in October.

SNOW (Fameuse). Bright red. White flesh. Spicy flavor. One of the best. Ripens in October.

PRICES SWEET. Splashed with red. Fair size. Bears annually. The best fall sweet apple. Entirely hardy. Ripens in September.

Winter Apples

JONATHAN. Good size, glossy, dark red. The prince of apples. Spicy and delicious. White flesh. Keeps till March. (Can't be beat).

Wealthy (Best Fall Apple)

DELICIOUS. This is truly a great Winter Apple. It is hardy in this latitude. Bears well, the fruit is unsurpassed.

In shape it resembles the Sheepnose. Price same as others. See cut front cover.

BEN DAVIS. Large size. Red splashed cheek. Bears every year. Quality fair. Produces more bushels than any other kind. Keeps well till April.

JANET (Geniton.) Small size. Pale green and red. Late blossom. Tender and crisp. Good quality. Very late keeper. Keeps till May.

YAGER APPLE TREES BEAR.

WINTER APPLES—Continued

GANO. Good size. Beautiful red toward the sun. Good quality. Fine for the market. Tree hardy. A money maker. Keeps till April.

RAMSDELL SWEET. Rather large. Dark red. Best winter sweet apple. Hardy and productive. Keeps till February.

SALOME. Good size. Yellowish red covered with bloom. Best flavor. Juicy and fine. Hardy on the prairies. Keeps till May. Highly recommended.

NORTHWESTERN GREENING. Very large, greenish yellow. Extremely hardy. Vigorous grower. Good quality. Fine for baking. Keeps till March.

WINESAP. Fair size. Dark red. Flat shape,. Juicy and tender. Tree hardy. Early bearer. Good for home orchard or market. Keeps till May. (Be sure and plant some.)

GRIMES GOLDEN. Medium size. Rich, golden yellow. Quality the very highest. Tender and spicy. Hardy. Keeps till February.

Jonathan

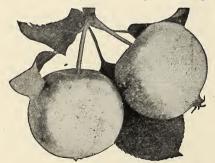

INGRAM. Fair size. Red striped. Very late bloomer. Splendid quality. Tender flesh. Keeps till May. (A good one.)

IOWA BLUSH. Medium size. White with red cheek. Quality fine. Hardy on the prairies. Keeps till February.

CRAB APPLES

FEW trees of the Crab Apple should be planted in every orchard, as they fill a place occupied by no other fruit. The crabs are hardy everywhere. The Whitney is especially desirable, as it is good for eating as well as other uses. (Price same as apples).

FLORENCE. Medium size. Yellow and red. Very handsome. Fine quality. Yellow flesh. Extremely hardy. Ripens in August.

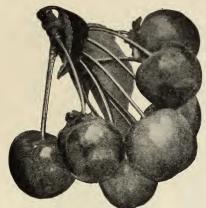

Whitney. The Best Crab of All.

HYSLOP. Large. Dark red. Very hardy. Good for pickles and jelly. Abundant bearer. Ripens in September.

TRANSCENDENT. Fruit medium size. Red and handsome. Fine for jelly and preserves. Great bearer. Ripens in September.

WHITNEY NO. 20. Largest size. White splashed with red. Juicy, but not sour. Hardy everywhere. Fine for eating in haying time. Ripens in August.

Our Apple trees are grown in the most skillful manner, propagated with the greatest care, and handled all the way through with a view of giving you the highest satisfaction possible.

Early Richmond

NOTE—Our Cherry trees this year are unusually well rooted, well branched, and just about perfect in every way. They will please the most critical person. Plant some of them.

CHERRIES

THE Cherry is one of our best cultivated fruits. A few trees in the back yard will yield a supply for the table and leave plenty for canning. These trees bear at an early age, usually two years from planting.

Every farmer needs a few Cherry trees. This fruit is exceptionally free from insect injury, or any form of tree disease.

Plant trees 12 feet apart in the row. The varieties listed below are the best known kinds.

PRICES ON CHERRY TREES

	Each	Per 10
5 to 6 feet tall, extra select (splendid roots)	\$0.85	\$8.00
4 to 5 feet tall, choice trees (splendid roots)	.65	6.00
3 to 4 feet tall, good stock (splendid roots)	.45	4.00

LARGE MONTMORENCY. Very large size. Light red color. Mild flavor. Rapid grower. Bears second year from planting. Ripens last of June. (One of the very best.)

DYEHOUSE. This variety is not as sour as the other early cherries. A very early and sure bearer.

EARLY RICHMOND. Fair size. Rich red, very juicy. The best for cooking, canning and shipping. The earliest to ripen. Bears very young and is hardy. Ripens early in June.

ENGLISH MORELLO. Medium size. Nearly black when ripe. Fruit juicy, dark and rich. Small seed. Quite hardy, good bearer. A good late kind. Ripens in July.

MAY DUKE CHERRY

If you want a Cherry a little better than anybody else has got, plant the May Duke. It is a beautiful grower; the fruit is very large and not as sour as other Cherries. Some folks call it a "Sweet Cherry." Price same as other kinds.

If you don't have a good supply of Cherries, you are passing up one of the best fruits we have.

PLUMS

HETHER you own a city lot, or a big farm, you should have some Plum trees. Plums bear the second or third year from planting. They require no special care, and take up but small space. You can have Plum Butter, Plum Jelly, Canned Plums for winter, Plum Pudding, and be "Plum Happy," if you plant a few trees.

The varieties I offer are selected with special reference to their good qualities; such as hardiness, early bearing, large size and best

flavor,

A few dollars invested in Plum Trees will return better dividends than we get from some of the "Get Rich Quick" schemes we invest in sometimes.

PRICES ON PLUM TREES

	Each	Per 10
5 to 6 feet tall, 3 year old, extra select	\$0.90	\$8.25
4 to 5 feet tall, 3 year old, choice trees	70	6.00
3 to 4 feet tall, 2 year old, good stock		4.50

AMERICAN SORTS

DESOTO. Good size. Yellow with red cheek. Best for canning. Very sweet. Bears young. Entirely hardy. One of the best. Ripens in August.

HAWKEYE. Very large. Yellow with red blush. Firm flesh. Very sweet. Perfectly hardy. Bears young. Ripens in September.

STODDARD. Largest size. Purple and red. Good grower, Hardy and prolific. Best for canning and market. A good one. Ripens in August.

WYANT. Good size. Purple and red. Very hardy. Nearly a free stone. Heavy bearer. One of the best kinds. Ripens in September. WOLF. Medium size. Yellow mottled. Firm and sweet. A freestone. Hardy and prolific. Ripens in August.

FOREST GARDEN. Largest size. Yellow with red cheeks. Very sweet and juicy. Small pit; thin skin; delicate flavor. Hardy everywhere. Bears early. Ripens in September.

HANSEN'S HYBRID PLUMS

Professor Hansen of South Dakota has introduced three Hybrid (crossed) varieties of Plums that are remarkable for hardiness, high quality and early bearing.

These plums combine the best traits of the whole Plum family. If you want a supply of Plums, plant some of these, especially the Waneta.

HANSEN'S HYBRID PLUMS—Continued

WANETA. This is the largest of the Hansen Plums; a heavy annual bearer. Fruit largest size; quality unsurpassed. Has delicious flavor, extremely hardy. Bears second year from planting.

SAPA. Another Hansen Plum. Early

bearer. Very hardy. Purple color when ripe. Shows fruit second year. A fine canning plum.

OPATA. A Hansen kind. Large in size Olive green color when ripe. Freestone. Pleasant flavor. Very desirable

PEARS

OU can raise Pears almost any place that corn is grown successfully. They bear quite as often as Apples and add greatly to the family fruit supply. As a canned fruit they have few equals. I offer only the hardiest kinds, and especially recommend Flemish Beauty and Keiffer.

PRICES ON PEAR TREES	Each	Per 10
5 to 6 feet tall, 2 year old, select	0.95	\$9.00
4 to 5 feet tall, 2 year old, choice	.80	7.50
3 to 4 feet tall, 1 year old, good	.60	5.00

DUCHESS. Very large size. Dull green color. Rich flavor. Bears the second year from planting. Juicy and rich. Ripens in September.

FLEMISH BEAUTY. Good size. Red cheek. Very hardy. Strong grower. Sweet and good bearer. Ripens in September.

BARTLETT. Large. Rich, golden yellow. Juicy and buttery. Fine flavor. Bears young. The best early pear. Ripens in August.

KEIFFER. Medium size. Beautiful yellow. Late keeper. The best late canner and market pear. The pear for everybody. Very hardy. Ripens in October and November.

ALL OUR TREES ARE VERY BEST QUALITY.

APRICOTS

THIS fruit is prized by all because of its excellent qualities. The tree is hardier than the peach, and should be planted by all lovers of fruit. The Russian varieties are hardiest. The two listed below being the best.

P	RICES ON APRICOT TREES	Each	Per 10
5 to 6 feet tall, 2 year ol	l, select	\$0.85	\$7.75
A to 5 feet tall 2 year ol	l choice	.60	5.50

ALEXANDER (Russian). Medium to small, light orange, yellow flecked with red; flesh tender, juicy, sweet and good quality; hardy; productive. July.

BUDD (Russian). Medium to large; light orange with blush on sunny side; flesh sweet, juicy, with flavor of the peach; hardy and productive. August.

PEACHES

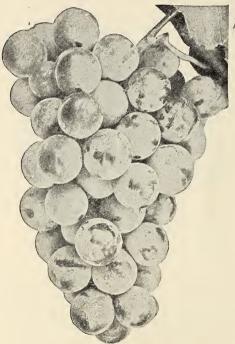

THE Peach is one of our most delicious fruits, but is not extremely hardy in this latitude except in sheltered locations. By planting the hardy varieties you will have a fair degree of success. Below are offered the hardiest known kinds.

PRICES ON PEACH TREES

									Each	Per 10
5	to	6	feet	tall,	2	year	old,	extra	\$0.60	\$5.50
4	to	5	feet	tall,	2	year	old,	choice	.50	4.50

ALEXANDER. Fair size. White skin. Red cheek. Juicy and sweet. A cling-stone. The earliest of all. Hardy. Ripens in July.

CRAWFORD'S LATE. Very large. Rich golden yellow. Freestone. The best canning peach. Perfectly hardy. Ripens in late September.

Concord (The Standard Grape)

BOKARA. Raised from seed procured in Bokara, Asia. It has been fruited in the Northwest for years and found to be one of the hardiest peaches known here. Tree has stood 28 degrees below zero with but little injury to the tips, and produced good crops. Fruit large yellow, with red cheek, of good quality. Perfect freestone; skin tough. A fine shipper. Ripens in August.

RUSSELL. Of Nebraska origin. Good size. Very attractive. Highest quality. Juicy and Sweet. Freestone. Exceedingly hardy. Ripens in August.

ELBERTA. Largest size. Yellow with red cheek. Good quality. Freestone. Very hardy. The market peach. Ripens in September.

GRAPES

O YARD is too small and no farm too large to have a place for some Grape vines. The beauty about this fruit is that it comes into bearing in so short a time after planting, and is almost a sure cropper. You cannot make a better investment than to plant some Grape vines.

Below are given the very choicest and hardiest varieties.

Plant six feet apart each way. The Grape is one of the most satisfactory of all small fruits, because it gives quick returns and is good for years to come.

PRICES ON GRAPE VINES

	Each	Per 10	Per 100
Concord, 2 year, extra heavy vines\$	0.16	\$1.50	\$13.00
Concord, 1 year, select good plants	.12	1.10	9.00
All other varieties, extra heavy		2.75	24.00
All other varieties, good vines	.25	2.25	16.00

GRAPES—Continued

ELVIRA. White color. Compact sweet. juicy bunch. Often used for wine. Very hardy and prolific. Ripens before Concord.

POCKLINGTON. White color. Good cluster. Large berries. Very prolific, sweet and tender. A good table grape. Ripens after Concord.

CONCORD. Black color. The standard grape both for home and market. The hardiest of all. Bears one year from planting. Juicy and sweet. Ripens in September.

MOORE'S EARLY. Blue-black color. Large cluster. Very hardy. Better quality than Concord. Ripens two weeks before Concord.

WORDEN. Blue-black color. Very high quality. Pleasant flavor. Juicy and sweet. One of the best for table or market. Ripens just before Concord.

AGAWAM. Rich red color. Large loose bunch. Tender, juicy and luscious. Fine for table. Ripens in September.

BETA. A black Grape and the hardiest one yet discovered. Is grown successfully in Dakota and Minnesota. Vines never winter-kill. The fruit is medium size and of good quality. It is a heavy producer and is an iron-clad. I especially recommend this grape to you.

Beta Grape (Very Hardy)

GOOSEBERRIES

Y OU will always find room for a few Gooseberry bushes. They are hardy everywhere and often show fruit the next year from planting. This fruit is prized by all. I especially want to call your attention to the Carrie variety, as it is a very superior fruit in every way, and if you like Gooseberries, try Carrie.

2 year old, any variety. Each Per 10 Strong plants\$0.16 \$1.50

Houghton Gooseberry (One-fourth natural size)

CARRIE. Originated in Minnesota. Fruit of largest size. A very strong grower and highly productive. Quality best. Not as sour as other varieties. Extremely hardy and most desirable.

CHAMPION. Medium in size. Quality good. Fairly free from mildew. Good grower, and quite productive.

DOWNING. Large size fruit. Whitish green flesh. Juicy and pleasant. A good grower. Fairly prolific.

HOUGHTON. Fruit is medium size. Plant is productive, healthy and a good grower. The old well known sort.

CURRANTS

URRANT jelly for color and quality takes first place, that is the verdict of the woman folks. This fruit needs no special care, is entirely hardy. Bears annually, and should be found in every garden. The North Star is my first choice.

PRICE ON CURRANTS

Each Per 10 \$1.60

NORTH STAR. This currant produces the largest sized bunches, and each berry is large size. The fruit is very rich in quality, not as sour as other kinds. A good market sort, and most desirable for jelly, as well as dessert.

RED CROSS. Brilliant red color. Fair size berries. Ripens early and a good producer. Quite reliable.

CHERRY. A well known sort. Large bright crimson berries. Very sour, but an old favorite. Berries in bunches, fair size.

WHITE GRAPE. Large size berry and bunch. The best white current grown. Flavor quite mild. A good grower and satisfactory in every way.

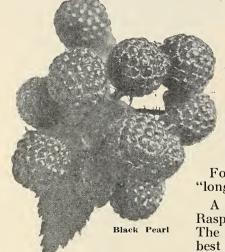

North Star Current

RASPBERRIES

BY ALL means plant some Raspberries. They are one of the leading small fruits and will bear the next year after planting. Give good cultivation and start with the right kinds and you will have success.

For pies, jam and canning they fill a "long felt want."

A big improvement has been made in Raspberries in the last two or three years. The Black Pearl and Cumberland are the best black ones; St. Regis is the best red one.

All varieties, 2 year old\$0.60

Per 10 Per 25 Per 100 \$0.60 \$1.25 \$4.75

BLACK PEARL. The Raspberry is one of our best fruits. Black Pearl has merits possessed by no other. Give it "half a chance" and it will surprise you. It won't sprout up all over the country. The canes are large and strong. The fruit is borne

in great clusters. Never freezes out. Stands drouth well. Berries largest size. Its chief merits are as follows: Fruit largest size—Bears Second year—Most delicious flavor—Remarkably prolific—Possesses extreme hardiness.

RASPBERRIES—Continued

CUMBERLAND. Largest size of all. Very firm and sweet. A strong grower. Entirely hardy. A good shipper. Annual bearer.

LOUDEN. Large, fine and sweet. Dark crimson color. Entirely hardy. A good one for market or home use.

EVERBEARING ST. REGIS RED RASP-BERRY. The past season this remarkable berry has again proven its merit. It bears throughout the entire season; stands dry weather well, and does not winter kill easily. Will bear fruit the first season planted. The fruit is a brilliant crimson color. Berries largest size. The quality of the fruit is unrivaled. Bears abundantly.

Everbearing St. Regis (One-half Natural Size)

EVERBEARING STRAWBERRIES

HEN the Everbearing Strawberry was announced, people said, "Ah Ha! Pure Moonshine; same as the White Blackberry, the Tree Gooseberry, the Wonderberry, and the Blue Rose." Folks who tried them, soon found them to be as represented, and have eagerly sought this splendid fruit; because of its exceptional merit.

The plants fruit the first year. Berries are as large as other sorts. The quality is unsurpassed. Just as sweet, no more seeds than others. Richest red color. Perfectly hardy. Multiply rapidly. Plant and cultivate them the same as other kinds and you will be pleased with results. We mail the plants to you the same day they are dug, so you get them fresh and vigorous. The Progressive Everbearing is the best.

PRICES ON EVERBEARING STRAWBERRIES

Per 25 Per 100 Per 1000

Progressive Everbearing

(Postpaid)\$0.50 \$1.40 \$10.00

500 or more at the 1000 rate. Special prices on larger quantities.

NOTICE-When your bundle of trees arrive, don't look for the Strawberry plants, as they are always sent separately by Parcel Post, Prepaid and fresh.

LISTEN! If you don't have anything else in your garden you should have at least a Strawberry bed. No other fruit comes into bearing quicker and strawberries and cream are about the best thing known to man.

BLACKBERRIES

DON'T know who discovered this fruit, but whoever did, conferred a great benefit on mankind. There is nothing else that will take the place of Blackberries with sugar and cream. A blackberry pie is just about the "best ever."

(One-third Natural Size.)

This fruit is easy to raise. Just give them half a chance and you'll sure get the fruit. The Snyder is the hardiest and best of all and is my first choice.

SNYDER. The old standard. Very hardy, consequently much raised in cold climates. Berries medium size, juicy, rich; strong, stout cane, thrifty growth and a very broad

PRICES ON BLACKBERRIES

Per 10 Per 25 Per 100 Snyder, best variety\$0.70 \$1.50 \$5.00

STRAWBERRIES

LONG in June, when you happen to call on your neighbor, and find her making a "three layer" shortcake, from berries picked fresh that morning from her own garden, you will at once plan to plant a patch for yourself.

Everyone can have strawberries in abundance. They are easy to raise, and require only a small space to grow. Spring planting is best.

The June varieties such as the Dunlap, will not fruit much the first

year, but the Everbearing will fruit the first year.

The Senator Dunlap is undoubtedly the best June variety for hardiness, size and bearing habit. It is self-fertilizing and may be planted alone. For variety, the other kinds listed here are the most desirable.

PRICES ON JUNE BEARING STRAWBERRIES

Any variety listed below (postpaid)..\$0.40 \$1.00 \$6.50 500 or more at the 1000 rate. Special prices on larger quantities.

SENATOR DUNLAP. The largest size berries. Bright red color. Peculiarly aromatic. A good shipper. Ripens midseason and is the most prolific and best berry yet discovered.

BEDERWOOD. Good size berries. Very sweet and firm. Rapid grower and heavy cropper.

CLYDE. Large berries. Crimson color. Flesh rich pink. Tender and delicious. Hardy and prolific.

SPLENDID. Large round berries. Dark red fruit. Mid-season sort. Elegant quality.

Senator Dunlap

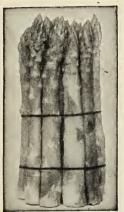

ASPARAGUS

BOUT the best thing for "Spring Fever" is a mess of home grown Asparagus. It is about the earliest good thing that comes from the garden. A bed of it will last for twenty years, and gets better all the e. The doctor says it is very beneficial to the health. It never freezes out, no insects attack it. You can cut it

during a long period, and the fact it, every family should

have it in the home garden.

Per 100 Per 25 PRICES ON ASPARAGUS Palmetto, 2 year old \$0.75 \$2.00 \$12.00 PALMETTO. Best kind, largest size, tender, early, crisp, hardy.

Palmetto Asparagus

RHUBARB or PIE PLANI

F ALL other garden products should fail, you can be sure of having nice juicy pies, and delicious sauce if you have a few hills of Rhubarb. Once planted it lasts for years. It just keeps growing and you keep using it. Rhubarb is the nearest thing to being an automatic pie factory of anything I know. The Victoria is best.

VICTORIA. Extra early; tender stalk; very juicy; not as sour as other kinds. Can be used for many weeks. Best for canning.

Victoria Rhubarb

FREE OFFER

GOOD TILL MARCH 25, 1926

I want to make you a nice present again this year. It is not for Father, but for Mother and the girls.

It will be a fine Dorothy Perkins Climbing Rose for the porch.

Send me an order for Nursery stock (not seed) for \$8.00 before the above date. and the Rose is yours—FREE. J. A. Y.

ORNAMENTAL DEPARTMENT

SHADE and ORNAMENTAL TREES

TREE is the silent friend of man. The Landscape would truly be cheerless and desolate without trees. The humblest home can be sheltered at small expense as well as the palatial mansion, by the planting of trees.

Land values are enhanced by suitable trees, whether it be in the city or on the farm.

A cottage by the roadside surrounded by trees and shrubs is the embodiment of our ideal of the most sacred place on earth—the HOME.

ASH, WHITE. Rapid growing tree of fine, symmetrical outline. A valuable street or park tree, and should be extensively planted.

MOUNTAIN ASH. Very hardy and handsome with fine clusters of scarlet berries hanging on the trees in winter. A beautiful tree for the lawn.

NORWAY MAPLE. Of spreading habit, dense foliage; dark green leaves; very hardy; a rapid grower; a rich and majestic shade tree for yard or street planting.

MAPLE, SOFT. Everybody knows this fine native tree. A rapid grower. Very graceful and hardy. Splendid for street and shade tree. This tree transplants easily.

ELM, WHITE. A splendid native. Easy to transplant. Very hardy. Graceful habit. One of the very best for lawn, street or shade tree.

LINDEN (Basswood). Rapid grower. A hardy and graceful tree. Has large, clean leaves. Produces sweet flowers much sought by bees.

Plant Some Trees

The Elm

Norway Maple, 6 to 8 feet	2.25	20.00
Mountain Ash, 6 to 8 feet	1.75	15.00

Forest Tree Seedlings

VERY farmer should have a windbreak or shelter belt. You save feed for your live stock through winter by having them behind a grove, and the friendly shade in summer is of great value. Start with some of my little forest trees and in a short time you will have a shelter, wood, poles and posts, besides adding 100 per cent to the looks of your farm.

PRICES ON FOREST TREE SEEDLINGS

Russian Mulberry, 12 to 18 inches tall	9.00
Russian Mulberry, 18 to 24 inches tall	12.00

Plan to Plant a Tree This Year

WEEPING TREES

REES of this class are much desired for their grace and beauty. As single specimens upon the lawn, along the street, or in the cemetery, they are highly prized for their elegance.

MULBERRY (Weeping). One of the finest and most graceful weeping trees, forming an umbrella-shaped head, with slender, willowy branches drooping to the ground. Foliage is beautiful; leaves distinctly lobed. Tree perfectly hardy, enduring the severe cold of the North and the extreme heat of the South. Very desirable.

CATALPA (Weeping Bungeii). This tree is grafted six or eight feet from the ground; has a straight body, and forms a remarkable dense, round head that presents the appearance of a beautiful green umbrella. Most desirable for lawn or street effect. This tree is hardy and dependable.

Prices on Weeping Trees

Mulberry (Teas Weeping), 2 yr. heads \$2.50 Catalpa Bungeii, 6 ft. stems, 2 yr. heads.... 2.25

Catalpa (Weeping Bungeii)

ORNAMENTAL SHRUBS

OU may have a home of stately proportions, or it may be only a modest cottage, but the picture is not complete unless you have an assortment of Shrubs. The diversity of foliage and bloom extending from May until winter is such as to afford a succession of cheer and beauty throughout the growing season.

No better investment can be made than in a few hardy Flowering Shrubs. My list comprises the hardiest and best bloomers for this

latitude.

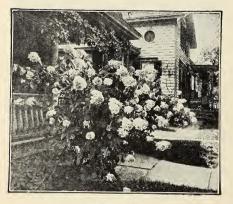

SPIREA (Bridal Wreath.) The best Spirea of all. Perfectly hardy. An annual bloomer, producing a wealth of white flowers. A good grower and makes a beautiful hedge. Can be sheared if desired.

HONEYSUCKLE (Bush Form). Not a vine but a splendid hardy shrub. Flowers in June and produces a profusion of sweet pink flowers, followed by showy red berries. Very desirable.

BARBERRY THUNBERGII (Japanese). A great acquisition for hedges or specimens. Perfectly hardy. Will thrive anywhere. Handsome foliage, green and copper-colored, but turning to orange and red in the fall. Scarlet berries line the branches all winter.

SNOWBALL. The old favorite. Hardy and free bloomer. Pure white blossoms in June. Blooms young and is very desirable.

ALTHEA (Rose of Sharon). A hardy shrub unsurpassed for profusion of bloom. Rich foliage and blooms until frost. We

Hydrangea

Bridal Wreath

can furnish them in the following colors: Deep red, purple, white and rose.

WEIGELIA (Rosea). This shrub blooms from June until fall. Erect habit. Attractive foliage. Very hardy and graceful. Flowers delicate pink.

LILAC (Persian). Purple flowers, sweet scented, willowy branches. Heart-shaped leaves. Very hardy and stronger than the common purple.

LILAC (White.) Very much the same habits and form as the Purple Lilacs except that it has pure white flowers. Very hardy.

BUTTERFLY BUSH

(Buddleia Magnifica)

The latest thing in gorgeous shrubs. Grows four feet tall. Has great clusters of lilac colored flowers. Very fragrant. Attracts large numbers of butterflies, hence its name. Exceedingly attractive.

ORNAMENTAL SHRUBS—Continued

HYDRANGEA (Paniculata). The best of the late flowering shrubs. Very hardy. A free bloomer. Produces immense clusters of creamy-white flowers. Blooms the first year from planting. One of the best.

MOCK ORANGE (Syringa). A very hardy upright shrub. Large, white, sweetscented blossoms appear in May or June. The finest perfume of the garden.

	Eacn	Per 10
2 to 3 ft. tall	\$0.60	\$5.50
18 to 24 inches	tall50	4.50

Note—These shrubs are good large, thrifty plants, and not to be compared with the small immature shrubs offered by some.

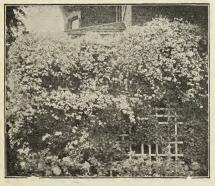

HARDY VINES

HERE is nothing more attractive than a vine in bloom by the porch or on a trellis. Vines may be used to cover fences, or to hide some unsightly object. Nothing is more pleasing than the fragrance and beauty of the Paniculata Clematis. The Honeysuckles are most attractive, also. The Wisteria with its wealth of purple is a benediction. The Woodbine affords shade and a riot of autumn hued foliage.

PRICES ON HARDY VINES, 2 Years Old

Clematis: Jackmanni, Henryi,	Each
Mme. Andre	\$0.90
All other vines offered	.50

CLEMATIS, Creamy White, (Henryi). A beautiful rich white flower, very large, often 4 inches in diameter. Hardy and attractive.

Clematis, White (Paniculata)
(This is best of the Clematis Family)

CLEMATIS, Crimson (Mme. Andre). Crimson red. Large flowers, 4 inches in diameter. Striking color. Good climber. Splendid foliage. Hardy.

CLEMATIS, Purple (Jackmanni). The queen of all vines for size and richness of flowers, which are violet purple, 3 to 4 inches in diameter. Needs winter cover.

CLEMATIS, White (Paniculata). The best hardy white Clematis. Vigorous, sweet-scented pure white flowers. Blooms late in summer.

HONEYSUCKLE (Scarlet Trumpet). A good hardy climber. Free bloomer. Flowers the shape of a trumpet. Fine for a trellis.

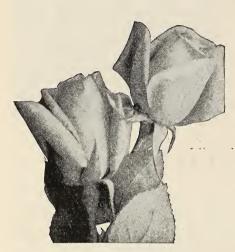

HONEYSUCKLE (Yellow Trumpet). Similar to above except that flowers are yel low. Very hardy and vigorous.

VIGOROUS CREEPER. A new hardy woodbine. Better than Boston Ivy. Good thick foliage. Splendid for clinging to walls of all kinds. Will grow anywhere. The best vine.

WISTERIA (Purple). A rapid hardygrowing vine. Produces large drooping purple clusters of flowers in May and June.

HARDY ROSES

HE ROSE is the finest cultivated blooming plant. The diversity of color and perfume is remarkable. The Rose is an emblem of purity, and its fragrance is ennobling. It softens the cares of life and gives us a glimpse of the beyond.

Frau Karl Druschki

Hardy Climbing Roses

FLOWER OF FAIRFIELD (Perpetual Flowering Crimson Rambler.) The best new hardy climbing rose yet discovered. Its flowers are produced in marvelous clusters like the Crimson Rambler, but the color is more brilliant. It is a strong grower and flowers freely throughout the entire season. You will not be disappointed in this rose.

CRIMSON RAMBLER. Rich Crimson red. Bears immense clusters. Very rapid grower. The best climbing rose known. Hardy everywhere.

DOROTHY PERKINS. Shell pink. Borne in clusters. Strong grower. Very hardy and rapid grower. The best pink climber.

PRAIRIE QUEEN Rose red. Large flowers, not fragrant. Rapid Climber. Very hardy. The good old-fashioned rose.

PRICES ON ROSE BUSHES

Bush Roses

FRAU KARL DRUSCHKI. White American Beauty. Pure snow, long buds, perfect double flowers; vigorous grower, of upright habit, luxuriant foliage.

PAUL NEYRON. Bright pink. The largest rose grown. Hardy, splendid fragrance. Strong grower.

GEN. JACQUEMINOT. Bright red. Large double. Fragrant, very hardy, and takes first place.

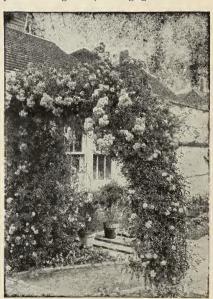

EARL OF DUFFERIN. Rich velvet maroon. Very double and fragrant.

PRINCE CAMILLE DE ROHAN. Dark red, almost black. Large, sweet, double and most elegant. Very hardy. The best dark rose.

MADAM PLANTIER. Pure white, not fragrant. Profuse bloomer. Very hardy. Often used for cemetery purposes.

CLIO. Creamy white, pinkish center. Large double flower. Delicate perfume. Very vigorous grower:

MAGNA CHARTA. Rose pink. Hardy, splendid fragrance, strong grower.

Crimson Rambler Rose

ORNAMENTAL HEDGES

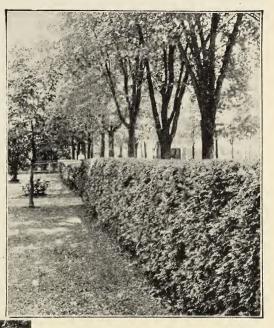

N LANDSCAPE work, and yard decorations, hedges are being planted more than formerly. As a division line, a hedge is most desirable, or it may be placed on either side of a drive with splendid effect.

As an outer enclosure, it is very attractive.

The three kinds offered here are the best for this latitude. The Privet and Spirea may be sheared to the desired height, thereby producing a formal effect. The Bar-berry should be allowed to grow naturally, thus preserving its beauty.

AMOOR PRIVET. Extremely hardy. Has no thorns. Dark glossy green foliage. Makes a dense growth. May be sheared to produce pleasing effect. Very attractive.

SPIREA VAN HOUTTEI. Often called Bridal Wreath. Very hardy. Long, delicate branches, covered with beautiful white flowers in June. Makes a splendid hedge.

Amoor Privet Hedge

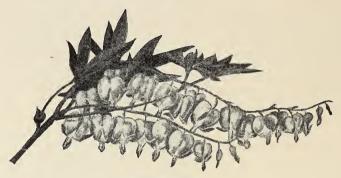

Barberry Thunbergii

THUNBERGII BARBERRY. Sometimes called Japanese Barberry. Hardy anywhere. Grows two or three feet tall. Branches covered with handsome little flowers, followed by small red berries that remain all winter. You can't beat it. (See picture.)

Hardy Perennial Plants

HERE is no class of plants more desirable than these. They are better than the annuals because you plant them but once, and each spring they come forth with renewed vigor to gladden the heart and embellish the landscape. The plants listed here are all hardy, and afford a profusion of bloom throughout the season.

Bleeding Heart

the most charming flowers. Blooming from June till November. Flowers range from pure white to darkest crimson. Plant in groups.

(Adam's Needle.) Stalks grow four to six feet tall. Are covered with large, bell-shaped flowers. Foliage green the entire year. Extremely hardy and conspicuous.

Yucca

MARVEL MALLOWS. This is one of the finest and best perennials yet introduced. The plant is perfectly hardy and never fails to bloom. The flowers are often six inches in diameter, almost pure white, with a velvety crimson center. Plants attain a height of four or five feet. A delightful object for the yard.

BLEEDING HEART. A great favorite, curious heart-shaped blossom. Fine for border or as a single plant. Blossom light red. Very hardy. Blooms in April and May.

Good for background. Very hardy. Flaming yellow, double flowers. Blossoms in August and September.

PAEONIES
HESE flowers stand in a class by themselves, being entirely hardy, having no insect enemies, and never failing to produce an abundance of fragrant blooms each year. Next to the Rose, the Paeony is the grandest flower under cultivation. Plants have been known to have bloomed for twenty-five consecutive years. They never fail you. The finest Decoration Day bloom.

The following kinds are the very choicest of the hundreds of known

varieties. Order by number.

No. 1-DUCHESS DE NEMOURS. The largest white Paeony of all. Very double. Has a delicate fragrance. The heart is touched with pink. Flower often four inches in diameter.

No. 2-F. ORTEGAT. Large crimson bloom. Very double. Bewitching perfume. Buds resembling the rose. Long stems.

No. 3—FLORAL TREASURE. Great pink flowers. Free bloomer. Very double and sweet perfume. A fine cut flower.

No. 4-L'MARTINE. Double pink bloom. Peach blossom color. Slender stems. Moss rose fragrance. Early bloomer.

No. 5-LOUIS VAN HOUTTE. Dazzling red. Rose shape. Medium size flower. Very double. Apple blossom odor. Blooms in mid-season.

No. 6-OFFICIANALIS RUBRA. rich crimson. Semi-double. Golden center. Always in bloom for Decoration Day. Very earliest.

Duchess de Nemours

FIELD SEED

I am sure you will be interested in knowing something about my SEED business.

During 1925 I distributed nearly 9 car loads of FIELD SEED in this part of the State.

Yes, we have no broadcasting station, except this silent little book.

This book does not suffer from "static" and there is no "interference," because Uncle Sam carries my message to you in black and white and red, and there is no need of a loud speaker.

The farmer that purchases FIELD SEED is not indulging in a luxury, but a REAL NECESSITY.

SEED sown is an investment that affords big returns, in many ways.

The land owner sows the LEGUMES, such as Red Clover, Sweet Clover, Alsike, Alfalfa, and Soy Beans, to maintain the fertility of his soil.

Larger and more profitable crops are secured, by sowing proper FIELD SEED.

The farmer who robs his land of all he can get, and gives nothing back, is usually found to be complaining that "farming don't pay."

100% on the investment seems too big to be true, but I know of many such instances, where farmers have sown the Clovers.

WHEN you receive this book I will be ready to supply at once, anything that is listed and at the prices specified.

But I cannot promise to maintain the prices on FIELD SEED, as the values may change. Nursery prices are good for the season.

As to FIELD SEED I have a large supply now on hand and will try to give you the best possible values for 1926.

On large quantities I can sometimes make a substantial reduction.

MY TERMS

PRICES. The prices quoted here are for seed delivered at depot or Express office at Fremont, Nebraska. You are to pay the Freight or Express charges. Terms, strictly cash.

SACKS. I make no extra charge for sacks. The sacks are "weighed in" as seed. Great care is taken to have good strong sacks, and in most cases I double sack the seed to avoid leakage.

GUARANTEE. I guarantee all seed shipped to you, to reach you in good condition. If sacks are torn or seed damaged, require the R. R. or Express Agent to note same on your freight or express receipt. Then notify me.

APPROVAL. When you get your shipments of seeds from me, if they are not as represented, write me about it, and I will adjust the matter satisfactorily with you. I will do everything possible to please you.

DISCLAIMER. The Yager Nursery & Seed Co. gives no warranty, express or implied, as to description, quality, productiveness or any other matter of any Seeds or Plants it sells, and will not be responsible for the crop.

FREE SAMPLES. Ask for free samples of seed. I like to have you see just what you are buying, and the seed I send will be exactly like the sample you get.

SUBJECT TO SALE. I have a large supply of seed on hand, bought right and all good stuff, and the prices I make you now are only good till the present supply is exhausted.—J. A. YAGER.

QUANTITY. On mail orders, I do not care to fill any orders for seed for less than \$1.00, as cost of handling smaller orders is excessive.

ALFALFA

IN driving about the country here in the corn-belt, I have wondered why more farmers do not have a patch of Alfalfa. Perhaps you are not fully aware of its merits as a hay pasture crop as well as a soil builder.

A FEW acres will afford a large amount of the most nutritious hay, or it may be pastured, giving the animals the bone sinew, and solid flesh that is most desirable. Sowing Alfalfa is no more risky than corn, wheat or oats.

THOROUGH preparation of the soil is VERY IMPORTANT. For Spring sowing, the land should be plowed four or five inches deep, and then the harrow and disc should be used until the land is "like a garden."

may be sown broadcast or with a drill. If a drill is used, sow the seed very shallow—never over one-half inch deep. After broadcasting, harrow lightly. Don't sow the seed too early in the spring. Wait till danger of frost is past, and the ground is warm.

use a light "nurse crop," either oats or barley. If oats is used, one and one-half bushels per acre is plenty. If you use more, it will smother the Alfalfa in a wet season.

FARMERS ask me when the best time is to sow Alfalfa—whether fall or spring. I will reply that there is no best time, as it depends on the season. Some succeed either fall or spring. Others fail. It depends on the soil and the season, the same as other crops. If you sow in the fall, August or September is the proper time, but no later.

Sow 12 to 15 lbs. per acre.

PRICES
Red Clover Seed
60 lbs. Per Bu.

Ask for Prices.

RED CLOVER

OOD farmers naturally turn to Red Clover for relief when their land shows signs of exhaustion. Thousands of instances could be enumerated to show the benefits of Clover as a fertilizer. Men who get 20 to 25 bushels of corn per acre and 12 to 15 bushels of wheat, can boost the yield at least one-third by using Red Clover on their land.

Crops of corn are nearly doubled, following Clover. It puts back the nitrogen into the soil. Wheat and other small grain yields are increased when a Clover field is turned over.

As a pasture crop it is in the front rank for cattle, horses, sheep and pigs. Clover hay contains the elements necessary to produce flesh, promote growth, and enhance the vigor and health of our domestic animals.

Clover is the salvation of the "run down" farm. It fills the barn with the richest hay known. It insures better grain crops which follow. It is the chief reliance in dairy regions.

When you drive through a region where Clover is grown extensively, you will notice ideal farm homes, big red barns, silos, machinery sheds, good fences, orchards, grain stacks and waving fields of corn. Yes sir! Clover and prosperity are half brothers.

By careful estimate, it has been found that plowing under a crop of green Clover, the equivalent of 12 loads of barnyard manure are added to the soil.

I don't say that Clover alone will make a man wealthy, but I do say that it is one of the fundamentals in successful farming.

Clover seed should be sown only in Spring, and with almost any of the small grains as a nurse crop.

Sow Clover seed and your profits will increase.

Sow 10 to 12 lbs. per acre.

PRICES

White Sweet Clover Seed 60 lbs. Per Bu.

Choice South Dakota	6.60
Fancy North Dakota	7.20

NOTE: All this seed is well SCARI-FIED (scratched) and is free of weed seed. It has high PURITY and good GERMINATION (Growth)

Yellow Sweet Clover, Fancy \$7.20

The Yellow is used only for pasture purposes.

WHITE SWEET CLOVER

OT many years ago we thought Sweet Clover was a worthless weed, and deserved only to be eradicated. It crept into the wild meadows and grew along the roadside, and was in the way just like a "sore thumb." Then it was discovered that cattle, hogs, sheep and horses would break down a fence to eat it. A man cut some for hay and said it was "bully good stuff."

The professors got busy and investigated its properties and sent out word that it was highly nutritious; had a splendid feeding value, and that it was one of the best pasture plants known. As a soil builder they held it to be first class.

Sweet Clover is not particular where it grows. It does well on the poorest land, whether hills or valleys, sandy soil, hard clay, alkali soil, gumbo, rich loam soil, dry soil or wet. It makes no difference for it has the hardihood of a mule, and makes good against all odds.

In the Spring it is ahead of other pasture crops, and it is the last thing in the Fall to quit business.

Stock never bloat on Sweet Clover. If you sow it with small grains and plow it under in the fall, you have added the equal of 15 loads of barnyard manure to the acre, and the following crop will show an increased yield of from 3 to 10 bushels per acre. The above statement can be proved in many cases. I have done it on my own land.

I recommend the White Blossom. Sow as early as possible in the Spring. Sow 12 to 15 lbs. per acre.

Alsike Clover

PRICE

Alsike Clover Seed 60 lbs. Per Bu.

Fancy Quality\$16.80

GOOD FOR Pasture.
MAKES fine hay.
Improves the soil.
Likes wet soils.
Sow with Timothy.
Bushel sows 10 acres.

ALSIKE CLOVER

HIS Clover is often called "Swedish Clover." In appearance, it resembles both the White and Red Clover, and by some is believed to be a hybrid between the two. Alsike will grow successfully where Red will not. In fact, where soils are too poor and exhausted for the Red Clover, Alsike will usually give most satisfactory results.

Like the Red, this Clover is a good fertilizer, adding both humas and nitrogen to the soil.

This Clover is especially adapted to low, wet soils, where the Red does not thrive, but is equally adapted to upland soils.

As a pasture crop it is one of the very best, often being sown with Timothy. An alsike pasture is good for years, as the plants live longer than the Red and re-seed more readily.

As a fertilizer of the soil, Alsike ranks with the Red, and repeated tests prove its worth as such.

Grown for hay, it will not produce as many tons as the Red, but its feeding quality-is superior to the Red.

Alsike will thrive on land that is too wet for Red Clover and is seldom ever known to winter kill.

Wheat and oats and other small grains following Alsike, show marked increase in yield.

The seed of this clover is only half the size of the Red, therefore a smaller amount is required for an acre.

Sow and handle same as Red Clover.

Sow 6 to 8 lbs. per acre.

PRICE

New Timothy Seed 45 lbs. per Bu.

Very fancy \$4.50
Timothy and Alsike Mixed
45 lbs. \$5.40
(25% Alsike)
Fine for PASTURE.

TIMOTHY

THIS is one of our best known hay and pasture crops and will succeed on any good soil where corn can be raised. In many sections, it is grown as an exclusive crop of hay for feeding horses, being recognized as very superior for this purpose.

Where soil has a tendency to wash, Timothy is sown, as the stiff sod prevents erosion.

A mixture of Timothy and Alsike Clover is very desirable either for hay or pasture, the seed required being Timothy 8 to 10 pounds and 3 to 4 pounds Alsike.

Grain crops following Timothy are materially increased by reason

of the added fertility.

When grown for seed purposes 6 to 8 bushels to the acre is the usual yield.

Seed should be sown in the spring. Sow 15 lbs. per acre.

AMBER CANE (Sorghum)

A S A FORAGE plant Cane is a very desirable crop. It produces a large amount of feed, often yielding five tons per acre. This plant adapts itself to almost all kinds of conditions. It will withstand severe drought, but thrives better under normal conditions.

Cattle, horses and mules as well as milch cows will fatten on the Cane and come out in fine shape in the spring.

Sow late in spring, one and one-half to two bushels per acre.

ASK FOR PRICES.

WHITE CLOVER (for Lawns)

HIS is sometimes called the White Dutch Clover and is the well known kind seen growing in pastures and on our lawns. For pasture, in combination with Blue Grass or Alsike, this Clover is very desirable.

As a fertilizer, it is desirable as the other Clovers, as proven by the increased yields of grain following a crop of this clover.

A field of this Clover is good for an indefinite period, as it re-seeds readily, and seldom ever winter kills even under the most severe conditions.

Should be sown very early in the spring.

Sow 5 to 6 lbs. per acre. Price 50c per Lb.

KY. BLUE GRASS

THIS plant is too well known to need a description. It is the kind we use on our lawns, and is found growing in our tame meadows, often being sown with White Clover. The plant is extremely hardy and endures almost all conditions of climate and weather.

Sow 20 to 30 lbs. per acre. Price 50c per lb.

SUDAN GRASS

HIS grass is strictly an annual plant as the roots do not live through our winter in the Northern States. Sudan is conceded to be one of the best hay and pasture crops. The hay is superior ton for ton, to Millet, Cane, or Timothy.

As a dry feed for milk cows, Sudan is only slightly less valuable than Alfalfa. Horses, colts and calves grow and fatten remarkably when fed on this hay.

As a pasture crop, for all kinds of animals on the farm, this grass is very desirable, especially for dairy cows.

When grown for hay, two cuttings are easily secured. Each cutting should yield from 2 to 3 tons of the very best dry hay.

Dry seasons when other crops are short, this grass will grow and produce an enormous amount of feed.

If you have no permanent pasture or hay meadow, you can depend upon Sudan to supply you.

upon Sudan to supply you.

May be sown from about May 10th to June 20th. Seed should be sown broadcast and harrowed in the same as oats.

Sow 20 lbs. per acre.

Price, 1 bushel, 50 lbs. \$3.00,

SOY BEANS

This crop is coming in favor, more and more each year.

They are very beneficial as a soil builder.

They make the best of hay for all stock.

They may be planted with corn for silage.

As a pig and calf pasture they are fine.

Sheep and lambs fatten on them wonderfully.

Plowed under for green manure they pay big.
Plant the Early Variety, "Aksarben." They mature in less than 100 days. Price 60 lbs. (1 bu.) \$3.00.

RAPE—Dwarf Essex

F YOU have a bunch of pigs, calves or sheep and want to see them grow and fatten rapidly, just turn them into a patch of Rape. This is a great green feed crop, and produces ten to fifteen tons per acre, and can be pastured continuously till killed by frost.

Hog breeders place a high value on this crop for cows and little pigs, because it promotes growth and vigor.

As a calf pasture it is very desirable, being a bone and muscle builder.

It grows well on any soil where corn will grow, and where permanent pasture is not available, this is one of the best crops.

Sow broadcast and cover with the harrow.

The first sowing may be made at corn planting time.

Sow 8 to 10 lbs. per acre. 50 lbs. (1 bu.) \$4.50.

GOLDEN MILLET

(German)

HIS is doubtless the best of all the Millets. A good feed for cows and calves but not for horses. It may be sown late in the season where other crops have failed. Should be cut for hav before seed matures for best results.

Often profitable when grown for seed purposes, as it yields a large amount of seed and is generally in demand by your neighbors.

Sow three-fourths to one bushel per acre.

Yager's 1926 Letter

Dear Friend:—It is with pleasure that I send you my little Tree and Seed Book, because I feel certain that you will be interested in what is offered herein.

Experience in the growing and handling of Nursery Stock is gained only after years of observation and study.

For nearly 30 years I have devoted almost all my time to the study of this subject.

A small orchard on every farm is as necessary as a machine shed, or a pump.

The day you plant Trees and Shrubs they begin to add beauty, comfort and profit.

California has "nothing on us" for the real flavor, color, and quality of our Fruit.

Put \$10.00 in a Little Orchard this Spring, and 5 years from now you would not let a man chop it down for a cold \$100.00.

Field Seeds are very important and necessary in the operation of the farm.

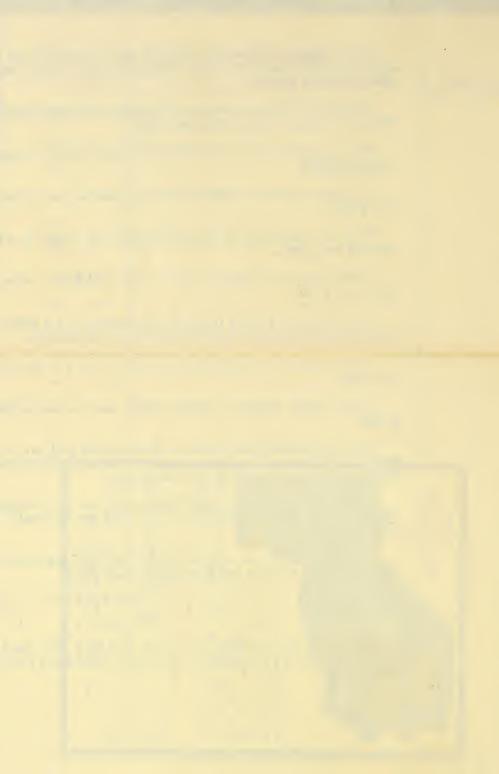

Good Seeds produce greater yields, and consequently BIGGER profits.

I have studied Field Seeds for many years and can say that the most painstaking care is given by me to secure and distribute only such Seed as will give my patrons the best results.

It is a pleasure to have my friends (who are near enough) to come and see me, look at my Seed and Trees, and get personally acquainted with me.

Hundreds of people come every Spring, and I am proud of my list of real friends, and the list gets larger every year.

P. S.—If you are short of paper, just turn this sheet over and write to me, and if I can help you with Farm or Orchard problems, I will gladly do so.
